Hydrobiologia

The International Journal on Limnology and Marine Sciences

Volume 460, 15 September 2001

Theme
The Ecology and Etiology of Newly Emerging Marine Diseases

Guest Editor
James W. Porter

Preface ix–xvi

Patterns of spread of coral disease in the Florida Keys
James W. Porter, Phillip Dustan, Walter C. Jaap, Kathryn L. Patterson, Vladimir Kosmynin, Ouida W. Meier, Matthew E. Patterson, Mel Parsons 1–24

White-band disease and the changing face of Caribbean coral reefs
Richard B. Aronson, William F. Precht 25–38

Quantitative assessment of coral diseases in the Florida Keys: strategy and methodology
D.L. Santavy, E. Mueller, E.C. Peters, L. MacLaughlin, J.W. Porter, K.L. Patterson, J. Campbell 39–52

Yellow band and dark spot syndromes in Caribbean corals: distribution, rate of spread, cytology, and effects on abundance and division rate of zooxanthellae
J. Cervino, T.J. Goreau, I. Nagelkerken, G.W. Smith, R. Hayes 53–63

Stony coral diseases observed in southwestern Caribbean reefs
J. Garzón-Ferreira, D.L. Gil-Agudelo, L.M. Barrios, S. Zea 65–69

Integrating microbiological, microsensor, molecular, and physiologic techniques in the study of coral disease pathogenesis
Laurie L. Richardson, Garriet W. Smith, Kim B. Ritchie, Richard G. Carlton 71–89

Laboratory models for the study of coral pathologies
Erik P. Scully, James Prappas, Gary K. Ostrander 91–95

Coral bleaching and disease: contributors to 1998 mass mortality in *Briareum asbestinum* (Octocorallia, Gorgonacea)
Drew Harvell, Kiho Kim, Craig Quirolo, Julianna Weir, Garriet Smith 97–104

Characterization of *Aspergillus sydowii* (Thom et Church), a fungal pathogen of Caribbean sea fan corals
Alisa P. Alker, Garriet W. Smith, Kiho Kim 105–111

Disease in Zoanthids: dynamics in space and time
A. Acosta 113–130

Microbial disease causation in marine invertebrates: problems, practices, and future prospects
Kim B. Ritchie, Shawn W. Polson, Garriet W. Smith 131–139

Marine ecosystems and cholera
Rita Colwell, Anwar Huq 141–145

Seasonal and interannual cycles of endemic cholera in Bengal 1891–1940 in relation to climate and geography
Menno Jan Bouma, Mercedes Pascual 147–156

***Vibrio cholerae* in recreational beach waters and tributaries of Southern California**
Sunny C. Jiang 157–164

Occurrence and distribution of the human pathogen *Vibrio vulnificus* in a subtropical Gulf of Mexico estuary
Erin K. Lipp, Cesar Rodriguez-Palacios, Joan B. Rose 165–173

Enteroviruses detected by reverse transcriptase polymerase chain reaction from the coastal waters of Santa Monica Bay, California: low correlation to bacterial indicator levels
Rachel T. Noble, Jed A. Fuhrman 175–184

Demographic, landscape, and meteorological factors controlling the microbial pollution of coastal waters
Michael A. Mallin, Scott H. Ensign, Matthew R. McIver, G. Christopher Shank, Patricia K. Fowler 185–193

Modeling studies of the effect of climate variability on MSX disease in eastern oyster (*Crassostrea virginica*) populations
Eileen Hofmann, Susan Ford, Eric Powell, John Klinck 195–212

How are climate and marine biological outbreaks functionally linked?
Marshall L. Hayes, Joseph Bonaventura, Todd P. Mitchell, Joseph M. Prospero, Eugene A. Shinn, Frances Van Dolah, Richard T. Barber 213–220

Mycoses in red snapper (*Lutjanus campechanus*) caused by two deuteromycete fungi (*Penicillium corylophilum* and *Cladosporium sphaerospermum*)
R.B. Blaylock, R.M. Overstreet, M.A. Klich 221–228
